OUR ENVIRONMENT POLICY

At Applecross Inn we are continuously committed to providing a good quality service, whilst minimising the environment impact of our services.

We do this by encouraging sustainable practices from both staff and visitors, by means of regular review and monitoring within the relevant environment legislation levels.

Some steps we have taken.

1. Fit low energy bulbs where possible.
2. Are replacing all equipment with A rating
3. Recycle glass, cans (for local primary school), paper, printing ink, towels & bedding.
4. We use natural cleaning products when possible.
5. Compost as much as we possibly can.
6. Return/Packaging
7. Encourage environment aspects, supply dog waste bags.
Nature spotting diary, walks leaflets, cycle storage.
8. Support as many local producers as possible.
9. Self control heating in bedrooms.
10. Fresh towels as guest request, minimum toilet flush.

We welcome support participation and suggestions from our customers on improving our environmental policy.
